

Changes to Chapter 11, pages 207 – 270

(Posted 03 Apr 12)

Paragraph 11-10, page 213. The paragraph heading should read “TRADOC Capabilities Needs Analysis (CNA)/Warfighter Outcomes Analysis (WFO).” Although the term Soldier has replaced Warfighter in Army text, the title of the function and the acronym have remained accepted usage according to the proponent at ARCIC.

Paragraph 11-60b, page 246. The term “Immediate Warfighter Needs (IWNs)” was a defense term explained in CJCSI 3470.01 among other places. This publication was rescinded in Jan 12 by CJCSI 3170-01 which cites the terms “Component Urgent Operational Need (UON),” “Joint Urgent Operational Need (JUON)” and “Joint Emergent Operational Need (JEON).” The stand alone term Immediate Warfighter Needs and the acronym IWN are no longer used in the defense and joint arenas. However the term warfighter need is still used routinely in joint staff papers .
